

High Temperature Hot Plate PA-3003

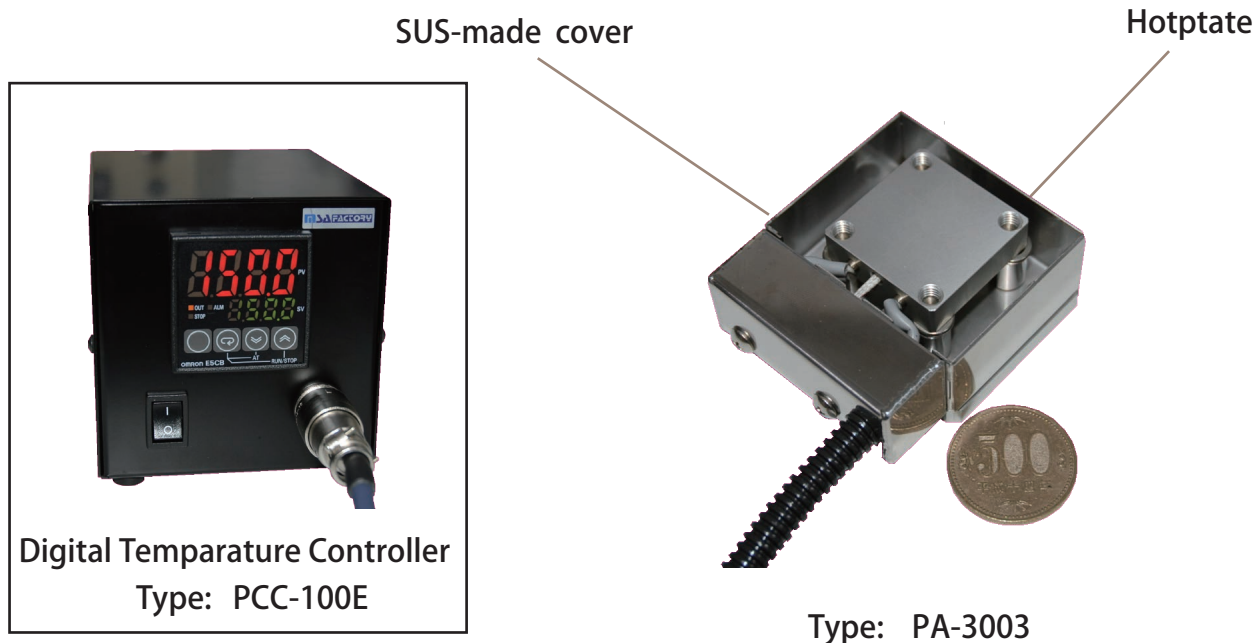

Characteristics

- Temperature Range: room-temperature~350°C
- Hot Plate Size: 30×30mm
- All MSA Hotplate shipped with certificate showing their performance at a factory inspection. (pre-calibrated for temperature)
- Our Controller system are external (sold separately)
- MSA Factory is a Japanese company which assembles hot plates in small lots to respond to each and every one of our customers' needs.

Structure/Application

Chemical / Research and development for Material
Ceramic/ Metal/ Inorganic

Specification/Customize

		○: Customized support
Temperature setting range	RT~350°C	—
Plate size	30×30mm	○
Temperature distribution	±0.7%	—
Heater	AC200,240V, 100W	○

High Temperature Hot Plate PA-3005

Characteristics

- Temperature Range: room-temperature~350°C
- Hot Plate Size: 50×50mm
- All MSA Hotplate shipped with certificate showing their performance at a factory inspection. (pre-calibrated for temperature)
- Our Controller system are external (sold separately)
- MSA Factory is a Japanese company which assembles hot plates in small lots to respond to each and every one of our customers' needs.

Structure/Application

Chemical / Research and development for Material
Ceramic/ Metal/ Inorganic

SUS-made cover

Hotplate

Type: PA-3005

Specification/Customize

		○: Customized support
Temperature setting range	RT~350°C	—
Plate size	50×50mm	○
Temperature distribution	±0.7%	—
Heater	AC200,240V,100W	○

High Temperature Hot Plate PA-3010

Characteristics

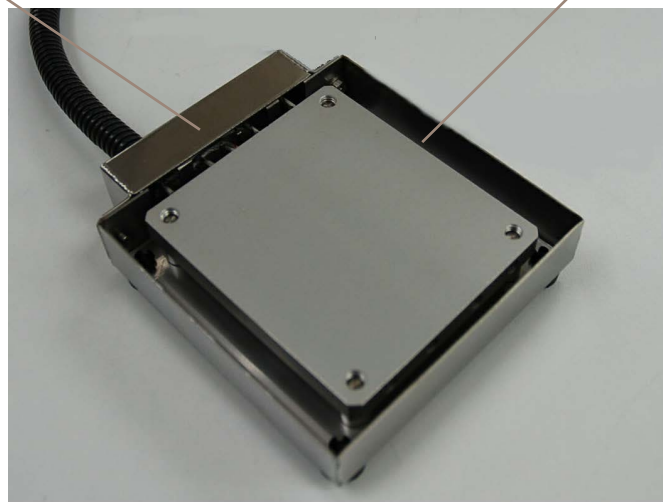

- Temperature Range: room-temperature~300°C
- Hot Plate Size: 100×100mm
- All MSA Hotplate shipped with certificate showing their performance at a factory inspection. (pre-calibrated for temperature)
- Our Controller system are external (sold separately)
- MSA Factory is a Japanese company which assembles hot plates in small lots to respond to each and every one of our customers' needs.
